### **Use of RallySafe Recce Lite Phone Application**

The organisers of the Shannons Rally Launceston will be using RallySafe Recce Light phone application at this year's event. As such it will be mandatory that all ARC entered competitors download and use the application in accordance with the attached instructions.

- RS Lite Recce Info

The purpose of the application is to allow the organisation to track competitors in the forest during recce, so we know where competitors are and to also allow for speeds to be tracked and enforced.

Any Breach of Reconnaissance Rules will be referred to the stewards for application of penalties.

The competitor invite codes will be available from the event secretary.

Hamish Marquis

Clerk of the course

### SHANNONS RALLY LAUNCESTON RALLYSAFE RECCE LIGHT CODES

| Vehicle | Class | Code   | Driver          | Co-Driver              |
|---------|-------|--------|-----------------|------------------------|
| 1       | ARC   | 963203 | Harry Bates     | John McCarthy          |
| 2       | ARC   | 691746 | Lewis Bates     | Anthony McLoughlin     |
| 3       | ARC   | 223066 | Richie Dalton   | Dale Moscott           |
| 4       | ARC   | 425972 | Troy Dowel      | Bernie Webb            |
| 5       | ARC   | 826614 | Tom Clarke      | Ryan Preston           |

| 28      | TRC   | 202426 | Nathan Stokes   | Ian Wheeler            |

# RS Lite Usage for 2022

20/05/2022

New RS Lite from RallySafe. The free app is available on the Google Play and Apple App store. Competitors are responsible for having a device capable of using the app with GPS tracking and a battery lasting the entirety of recce. Considerations should be made to make sure the phone or tablet can be charged and there are no 3<sup>rd</sup> party applications that may disable GPS tracking.

QR CODE FOR BOTH HERE:

(Google Play Store)

(Apple App Store)

When you arrive and check in at the event, each car number will be given a unique code to enter into the app.

Main Screen when app is opened. Click "add event".

Enter unique code.

Click add event.

Click accept invite.

Click start tracking when beginning recce.

Main Screen off stage when tracking.

When logged into the event with your code, the main screen will display your current speed and two odometers. Both odometers can be reset by pressing and holding the mileage.

As you arrive to a stage, the screen will display the maximum KPH allowed, along with the odometers and your current speed. If you exceed the allowed speed limit, a red bar speeding message will be displayed at the top of the screen.

80kph is the speed limit.

Note the speeding message.

When you begin recce, the application must be active on your phone and stay active during transits and while on stages. The phone can be used for other uses such as texting, navigation, etc. but should stay on the RS Lite app as much as possible during transits and at all times on stages. Your position, speed, and direction of travel will be monitored during the recce period

Additionally, if the app is forcefully disabled on stage, a report is generated and may result in an infraction being applied. With privacy concerns in mind, the app does not track or send data if it is not active on the screen. Because of this, competitors must make sure the app is active during recce. If the app doesn't report for an extended period of time during recce, an alert is sent in the monitoring system.
